# WHERE ARE WE NOW?

## OUR WEBSITE IS SCHEDULED TO LAUNCH Q2

It will provide to patients and the public, as well as to  
professionals.

Patients will find multimedia information about the disorder,  
about ongoing research. Preferably, we will work with you to  
provide the info in the languages English, Dutch, French and  
Danish. We are also considering a patient forum together with  
patient representatives.

Professionals will have a website to refer their patients to, find  
information about research on the topic in general and study  
information.

## APPROVAL

We are currently awaiting approval from the Dutch central  
committee on research involving human subjects (ccmo).

We hope to receive response soon

## PARTICIPATING COUNTRIES

We are preparing for sites from Denmark, Belgium  
and the Netherlands to participate. The study should  
roll-out in 2024, so expect us to reach out! We are  
looking forward to collaborating with you!
