

# SAVE FGR NEWSLETTER

## INITIAL RESPONSE FROM THE CCMO!

We are very excited to let you know that we have received the initial response from the central committee on research (CCMO) for the SAVE FGR trial!

The primary news is that the study is not categorized as a Medical Device Regulation (MDR) study but as an observational study.

The next step is resubmission next week!

In the meantime we are working hard on getting all the preparations ready for the start of this trial:

- the contracts with (commercial) partners which will be finalized this month
  - contract development involving all participating healthcare centers
  - finalizing protocol development
- website development: [www.fetalgrowthrestriction.com](http://www.fetalgrowthrestriction.com) (under construction)

We are very proud of our animated video in which we aim to provide information about this trial to our patients:

Please check it out in your preferred language!

We're thrilled to announce our upcoming gathering on January 30th and 31st 2025. The 'Elise Mathilde Fund Foundation' offered the project team a two day stay to allow insightful discussions, deepening collaborations, networking opportunities, and much more!

Participate on invitation due to limited space

Furthermore...

We want to thank our Danish team for their hospitality and collaboration during Wessel's visit! The warm welcome and support were much appreciated.

Let's continue to foster this fruitful partnership as we move forward!

THANK YOU    MERCI    TAK    DANKJEWEL
